

46 This Policy forms part of BU's contribution to achieving the UN Sustainable Development Goals.

The University is committed to

- 51 Managing its estate to minimise harm to the environment and seek opportunities for enhancement;**
- 52 Providing a high quality work and study environment to support the health and wellbeing of staff and students;**
- 53 Maintaining existing buildings and infrastructure to provide world class facilities to support the business.**

Bournemouth University will consider the sustainability implications of building materials, construction activities and building operations, and will undertake all construction activities for new build, major and small refurbishments, minor works and maintenance projects (incidental minor new works and upgrades) in line with the following principles:

- 61 Specifications should consider economic, social and environmental issues;**
- 62 Environmental risks should be identified and managed to minimise and mitigate any negative impacts and seek opportunities for enhancement;**
- 63 The near lean green philosophy should be used to inform the design, minimising the demand for resources, providing efficient strategies and deploying renewable solutions to minimise residual carbon emissions;**
- 64 All work for IL**

613 All construction activities will have a suitable Site Waste Management Plan and will seek to design out waste both during construction and from the useful life of the building

614 Contractors involved in construction projects should
