# 1. What is ARC?

The School of Health and Social Care has implemented a new placement management system called ARC. The system consists of three modules:

- ARC Core Application - this module is currently being used by the Placement Team to upload the students' placements, record students' sickness/absence and record their made up time. Information on all the placement areas is maintained in this application.
- ARC PEP (Practice Environment Profile) - this is an online application which is used by the placement areas to find out their student allocations. This module allows placement areas to share information with students (Contact Details, Learning Environment, Facilities available on Site, Travel Directions, Policies and Procedures, Shift patterns etc.) and also notify the placement team about student's absence. In the future, audits and student evaluation will be embedded into PEP.
- ARC POW (Placements on the Web) - this is the online application for the students where they will need to log in to find their placement allocations, view their attendance record, evaluate placement areas etc. Some of the information from the PEP is displayed in POW to give the students more details regarding their placement areas before they start their placement.

Academics will also have access to the ARC POW application. It will give you access to students' contact details, their allocations, attendance record etc.

## 2. POW User Account and Logging in
